## OUR BUSINESS

Ginseng raw materials and related products import, export, wholesale, and retail

Since its establishment, we have visited leading ginseng production areas in Japan and overseas, and we only handled high-quality raw materials, in which we have confirmed with our own eyes the cultivation conditions and agricultural chemicals used.

We search for ginseng with reliable quality and high content of active ingredients and strive daily to provide a rich lineup of raw materials, competitive prices, and a stable supply of ginseng so that we can respond to various needs.

## OUR BUSINESS

Export of peonies, leasing and winter peony production

The language of flowers of peony is noble and wealthy.

Peony is also known as the "King of flowers" because of its gorgeous blooms.

Originally, peonies bloom in spring, but in order to enjoy their gorgeous appearance even in winter, we control the temperature thoroughly and adjust the flowering time of peonies, which is called "Winter peony".

We produce winter peonies every year and lease them to tourist facilities and sell them as gifts.
